## RAVEN GUIDANCE

**Building the Platform for Success**

# YOU'RE ALWAYS RIGHT ON TARGET WITH RAVEN'S GUIDANCE SYSTEMS

There's no second guessing it, whether you are looking for a simple lightbar system with Raven's Lightbars, or you are looking for the ultimate guidance solution with Raven's New! Envizio—when you have Raven's Guidance systems, you're always right on target. Our user-friendly technology makes getting the most out of every acre as simple as turning a key. If you are looking to get more out of your guidance system, there's no question—get a Raven Guidance System.

## Envizio

The Envizio introduces the exclusive LastPass Guidance Pattern. The LastPass Guidance Pattern enables the operator to drive to their nearest "last pass" without having to set any points. LastPass makes it simple to show where you have been and reduces spot skips and overlaps.

- Quick and easy setup
- Down-field & birds-eye view
- GPS status screen with the AutoDetect feature
- Field boundaries to total acres
- Field map review with zoom and vehicle lock
- Color Touch screen interface
- 2 USB ports for data transfer
- RAM™ mount system
- LED and on-screen guidance
- Boom sense wire or tap screen for coverage
- Compatible with SmarTrax™ controller & Raven Lightbars
- Field Review mode that indicates overlap
- Ability to switch between "LastPass" pattern and "Straight" swathing within the same job
- Data Logging: ability to save and download coverage maps

Read what our customers have to say Raven Guidance...

“For the last eight years, I operated a sprayer with a 90 ft. boom. I used foam but always second guessed it. Now, I use Raven's Lightbar and there is no second guessing.”

**Dave Didier, Franklin Grove, IL**

“We used to use foam. Now with Raven's Lightbar we don't have to look for foam on those hot summer days. I just sit back and watch my sprayer. I drive straighter, spray more accurately, and have reduced my overlap. The Raven Lightbar is a good investment.”

**Keith Harvey, Eastern Farmers Coop Elevator, Crooks, SD**

“The SwathSmart Guidance System adds excellent value to our operation. Right now we use it for parallel swathing during spraying – but we hope to add an air seeder in the near future, and then we will use the SwathSmart instead of row markers. Raven's customer service has been excellent, and the price is very competitive.”

**Ray Stone, Walnut Ridge, AR**

“I use my Raven Lightbar on four different tractors during the year. The versatility and uses are endless. I'm looking forward to finding new applications for it.”

**Aubrey Falls – Rise to Set Farms, Ruleville, MS**

## RGL600ic Lightbar

- Large Display Screen – Instant Access to Swath Number, Swath Error, Course Heading
